# INDEX OF SUBJECTS AND AUTHORS

Acidity, Gastric, in pulmonary tuberculosis, 460

Acinus, Pulmonary, 261

Acute subapical versus insidious apical tuberculosis, 162

ADAMS, W. E., AND SINGER, J. J. The clinical improvement of pulmonary tuberculosis by massive atelectasis, 373

Addison's disease, causative factor in, Tuberculosis as, 333

—— —— in chronic pulmonary tuberculosis, symptoms of, Amyloid degeneration of the adrenals as a factor in producing, 1

Administrative problems in case-finding of tuberculosis, 584

Adrenals, Amyloid degeneration of the, as a factor in producing symptoms of Addison's disease in chronic pulmonary tuberculosis, 1

Aetiology of tuberculosis, Psychic element in, 233

Allergy in experimental tuberculosis, Complement fixation as related to resistance and, 54

Alternately expanding and contracting tuberculous cavity, 475

American Negro, Pulmonary tuberculosis in, 413

—— tuberculosis sanatoria, 1915–1930, artificial pneumothorax in representative, survey of, A, 85

Amyloid degeneration of the adrenals as a factor in producing symptoms of Addison's disease in chronic pulmonary tuberculosis, 1

Antigenic properties of defatted tubercle bacilli, Comparison of, and their derived proteins, 547

Apical localization of pulmonary tuberculosis, 151

—— tuberculosis, insidious, Acute subapical versus, 162

Architecture of terminal sections of bronchi of human lung, 261

Artificial pneumothorax in Connecticut, First cases of pulmonary tuberculosis treated by, 401

—— —— —— representative American tuberculosis sanatoria, 1915–1930, survey of, A, 85

—— —— —— treatment of progressive minimal pulmonary tuberculosis, 518

—— ——, pulmonary tuberculosis under, Bronchial obstruction as a complication of, 44

—— ——, Question of when, should be discontinued, 139

—— —— therapy, Hypersensitivity to novocaine in, 147

—— —— ——, leucocytic reactions as found with and without, Comparison of, 628

Asbestosis, Pulmonary, 25

Atelectasis, massive, Clinical improvement of pulmonary tuberculosis by, 373

Atelectatic bronchiectasis, Roentgen-ray appearance of lung fields in, 121

Bacilli, tubercle and leprosy, phosphatides of, Precipitin reaction to, 307

——, ——, defatted, and their derived proteins, Comparison of antigenic properties of, 547

——, ——, Longevity of, in sewage and stream-water, 493

Bacillus Calmette-Guérin (*BCG*), Lesions in rabbits following inoculation with, 323

——, tubercle, Progeny of, 350

BAKER, A. B. Complement fixation as related to resistance and allergy in pulmonary tuberculosis, 54

BAKER, CLARENCE S. See CRIMM, PAUL D., *et al.*, 393

(*BCG*), Bacillus Calmette-Guérin, Lesions in rabbits following inoculation with, 323

(*BCG*), colony morphology and pathogenicity of, Stability of, 174
BEHNER, DOROTHY M. The stability of the colony morphology and pathogenicity of *BCG*, 174
Blood counts in clinically healed pulmonary tuberculosis, 217
BOISSEVAIN, C. H. A comparison of the antigenic properties of defatted tubercle bacilli and their derived proteins, 547
——, ——. ——. Decomposition of tuberculoprotein, starch and gelatin by dry grinding, 542
BOOKS:
POTTENGER, FRANCIS MARION. Tuberculosis in the child and the adult, 104
LAMBEA, VALDÉS. Terapeutica fundamental de la tuberculosis, 106
MILLER, RICHARD H. Tuberculosis of the lymphatic system, 107
WHITNEY, JESSAMINE S. Death rates by occupation, 110
BLANCO, RAUL A. PIAGGIO AND CAPURRO, FEDERICO GARCIA. Estudio etiólogico y topográfico de los procesos localizados del tórax, 111
WOLTER, FRIEDRICH. Das Tuberkulose-Rätsel von Pesterzsébet und seine Lösung vom epidemiologischen Standpunkt, 109
GLASSER, OTTO. Wilhelm Conrad Röntgen and the early history of the röntgen rays, 112
——, ——. The science of radiology, 113
BUCK, ROBERT W. The essentials of physical diagnosis, 114
STERN, NEUTON S. Clinical diagnosis, physical and differential, 115
ABRAMSON, HAROLD A. Electrokinetic phenomena and their application to biology and medicine, 115
NATIONAL ORGANIZATION FOR PUBLIC HEALTH NURSING. Survey of Public Health Nursing, 118
STAFF OF MARY IMOGENE BASSETT HOSPITAL. Clinical miscellany, 119
BOQUIST, H. S., SIMONS, J. H., AND MYERS, J. A. Pregnancy following extrapleural thoracoplasty, 48
BREUER, MILES J. The psychic element in the aetiology of tuberculosis, 233
Bronchi of human lung, terminal sections of, Architecture of, 261
Bronchial obstruction as a complication of pulmonary tuberculosis under artificial pneumothorax, 44
Bronchiectasis, atelectatic, Roentgen-ray appearance of lung fields in, 121
BRONFIN, I. D., AND GUTTMAN, PAUL H. Amyloid degeneration of the adrenals as a factor in producing symptoms of Addison's disease in chronic pulmonary tuberculosis, 1
Bulla of lung, Giant saccular, 240
BUTLER, H. W. See THURINGER, J. M., 466

Calculator, Presentation of leucocytic index with, to facilitate its computation, 611
Case-finding of tuberculosis, Administrative problems in, 584
Cases of pulmonary tuberculosis, First, treated by artificial pneumothorax in Connecticut, 401
Causative factor in Addison's disease, Tuberculosis as, 333
Cavities in pulmonary tuberculosis, 658
——, pleural, Operation of Pascal's principle in lungs and, 299
——, pulmonary, tuberculous, collapse therapy of, Modern concepts of, 499
Cavity, tuberculous, Alternately expanding and contracting, 475
Chest technique, roentgenological, double-exposure, A, 50
Children, Negro, Tuberculosis among, 429
Chronic pulmonary tuberculosis, symptoms of Addison's disease in, Amyloid degeneration of the adrenals as a factor in producing, 1
Clinical improvement of pulmonary tuberculosis by massive atelectasis, 373
Clinically healed pulmonary tuberculosis, Blood counts in, 217
Clinics, tuberculosis, in Grays Harbor County, Washington, statistical study of, A, 74
COCKE, CHARLES HARTWELL. Pleural shock, 404

Collapse therapy of tuberculous pulmonary cavities, Modern concepts of, 499
Colony morphology and pathogenicity of *BCG*, Stability of, 174
COLTON, W. A. Tuberculosis as a causative factor in Addison's disease, 333
Community tuberculosis program, How to determine emphasis of, 591
Comparison of antigenic properties of defatted tubercle bacilli and their derived proteins, 547
—— —— leucocytic reactions as found with and without artificial-pneumothorax therapy, 628
Complement fixation as related to resistance and allergy in experimental tuberculosis, 54
Complication of pulmonary tuberculosis under artificial pneumothorax, Bronchial obstruction as a, 44
Concept, pathological, Presentation of, through use of leucocytic index in selected groups of tuberculous cases, 621
Concepts, Modern, on collapse therapy of tuberculous pulmonary cavities, 499
Connecticut, First cases of pulmonary tuberculosis treated by artificial pneumothorax in, 401
Contracting tuberculous cavity, Alternately expanding and, 475
CRAWFORD, A. M. A presentation of a leucocytic index with a calculator to facilitate its computation, 611
CRIMM, PAUL D., STRAYER, J. W., AND BAKER, CLARENCE S. Thoracoplasty, 393
Culture media, solid, Subsurface growths of *Mycobacterium tuberculosis* in, 466
CUNNINGHAM, RUBY L. Tuberculosis among university women, 576

Decomposition of tuberculoprotein, starch and gelatin by dry grinding, 542
Defatted tubercle bacilli and their derived proteins, Comparison of antigenic properties of, 547
Degeneration, Amyloid, of the adrenals as a factor in producing symptoms of Addison's disease in chronic pulmonary tuberculosis, 1
Discharge from sanatoria, Follow-up information on 2,031 tuberculosis patients one to thirteen years after, 62
Doctors and nurses, tuberculoallergic, at Fitzsimons Hospital, Reinfection among, 203
DONNELLY, J. Tuberculosis among Negro children, 429
Double-exposure roentgenological chest technique, A, 50
DOUGLAS, BRUCE H., NALBANT, JOHN P., AND PINNER, MAX. Acute subapical versus insidious apical tuberculosis, 162
Dry grinding, Decomposition of tuberculoprotein, starch and gelatin by, 542
